# Manish Srivastava

**Full Stack Java with Angular Developer – 9 Years Exp**
**Krakow, Poland**

**Ph: (+48) 571515162**
**Email:** manishsrivastav0786@gmail.com
**Web:** https://itsmanish.com

## ABOUT ME

Experienced Full Stack Java Developer with a strong focus on Angular development. Proficient in crafting dynamic web pages, designing intuitive interfaces, and building robust RESTful APIs using a technology stack that includes Spring Boot, Angular, NgRx(Redux), PrimeNG, Angular Material, HTML, CSS, CSS3, Bootstrap, Hibernate, JavaScript, TypeScript, JSON, and Microservices. Specialized in MicroFrontEnd architecture, I bring a comprehensive skill set to deliver innovative and scalable solutions. Passionate about creating seamless user experiences and committed to staying at the forefront of technology trends.

## EDUCATION

**Kanpur University**                                                                                 Kanpur, India
Bachelor of Computer Application (B.C.A)                                              2012-2015

**B.N.S.D Inter College**                                                                          Kanpur, India
Intermediate (12th)                                                                                   2010-2012

## SKILLS

- **Tools:** Git, Visual Studio Code, Spring Tool Suite (STS), Atlassian (Bitbucket, Confluence, Jira), Postman, Git Hub, SVN, J Frog, Devops, Docker, Jenkins, Azure DevOps, Swagger, Dynatrace, Sitecore, Figma
- **Back-End - Languages, Frameworks & Libraries:** Java 8, Java 11, Hibernate, Spring Boot, Spring JPA, Spring Cloud, Spring Security, Maven, Apache Tomcat, Rest API (RESTful API), Tomcat, Jboss WebSphere, Microservices, SOAP API's, XML, API Getway, Kafka
- **Front-End - Languages, Frameworks & Libraries:** Angular (versions 4,5,6,7,8,12,13,14,15), NgRx – Redux, RxJS, TypeScript, JavaScript, HTML, CSS, CSS3, Material CSS, PrimeNg, Bootstrap, Mircofrontend, Sitecore, storybook, figma
- **Database:** MySQL, Oracle, MongoDB, SQL
- **Testing:** Junit, Unit Testing, Mockito, Jest, Cyprus, E2E Testing, TDD, Selenium

## EXPERIENCE

**HCL Technologies**                                                                          **Krakow, Poland**
**Technical Lead**                                                                          29/03/2022 – Present

- Designed and developed scalable and maintainable applications using Spring Boot and Angular, ensuring high performance and user satisfaction.
- Implemented state management using NgRx(Redux) for front-end application.
- Implemented Microservices architecture for Front-End and back-End both, enhancing system flexibility and resilience.
- Utilized Spring JPA and Hibernate to interact with Oracle, MySQL, and MongoDB databases, optimizing data retrieval and storage processes.
- Collaborated with cross-functional teams to define and implement REST and SOAP APIs, ensuring seamless communication between various components.
- Conducted code reviews, wrote unit tests using Junit, Mockito, Jest, e2e and Cyprus, and participated in the continuous integration and deployment processes.
- Integrated security features using Spring Security, enhancing application protection against potential threats.

- Implemented responsive and visually appealing user interfaces using Angular, NgRx, HTML, CSS, SASS, and Angular Material.
- Actively participated in the adoption and integration of CI/CD pipelines, optimizing the development workflow.
- Collaborated with DevOps teams to maintain and troubleshoot Linux-based servers, deploying applications on Apache Tomcat and JBoss.
- Engaged in Agile development methodologies, contributing to sprint planning, daily stand-ups, and retrospective meetings.
- Contributed to documentation using Confluence and collaborated with team members through JIRA for issue tracking.

**Tata Consultancy Services ltd**  **Budapest, Hungary**
**Full Stack Developer**  08/2021 – 28/03/2022

- Worked on a Hungarian Telecom project, handling both inbound and outbound requests. Developed REST APIs for multiple modules using Java 8+ and Spring Boot, Spring JPA and Hibernate.
- Implemented microservices using Spring Cloud, demonstrating expertise in microservices patterns using Kafka.
- Enhanced application performance through optimization techniques
- Implemented a scheduler using Quartz to handle parallel requests more efficiently, showcasing strong knowledge of task scheduling.
- Actively participated in client discussions, proposing effective solutions based on project challenges, demonstrating excellent communication and problem-solving skills.
- Assisted and mentored new team members in overcoming technical challenges, showcasing leadership and teamwork.
- Utilized Git for version control, Linux for the development environment, Spring tool suits and Visual Studio Code as the primary IDE.
- Expanded responsibilities to include front-end development using Angular (versions 4,5,6,7,8,12), contributing to a holistic Full Stack role.
- Designed and implemented responsive and visually appealing user interfaces, utilizing HTML, CSS, SASS, Angular Material, PrimeNG and Bootstrap.
- Collaborated closely with the UI/UX team to ensure a seamless integration of the front-end and back-end components

**Tata Consultancy Services Ltd**  **New Delhi, India**
**Full Stack Developer**  22/07/2016 – 08/2021

- Played a key role in the banking and pharma team, planning, designing, and developing products for internal use cases.
- Developed a fully dynamic application where configurations were stored in the database, demonstrating expertise in database-driven applications.
- Served as the Application Architect, contributing to the overall design and architecture of the applications, showcasing strong design skills.
- Actively participated in designing and implementing microservices for improved scalability and maintainability.
- Customized and generalized applications for new customers, ensuring adaptability and scalability, showcasing versatility.
- Proficiently used JIRA for project management and Bit Bucket for version control.

## PROFESSIONAL ACHIEVEMENTS

- Awarded TCS Gems-Technical Excellence Award for end 2 end project development with microservice architecture.
- Awarded TCS Gems-On the Spot Award for Automation related to reports
- Awarded TCS Gems-On the Spot Award twice for adapting to project expectation and delivering service
- Awarded TCS Gems-Star of the month award for significant contribution in automation.
- Received appreciation from PL for performing exceptionally well during Automation.
- Received appreciation from Onsite Manager for on the spot webpage Validation.
